

Edgyp notes corrected & returned Nov 10. [Ind.]

Captiva.

Beginning immediately

Inject 2 rabbits as decided
in Rodeff at Al J. Esc. Est. - June 52.
Inject make dose ^{twice weekly}
namely 0.2 microminipergon.

^{2 months}

Inject each rabbit with 500 dose

putting 300 on each hip.

Repeat injection each week for ^{4 weeks}
~~too~~

Hold back half the pups
so that flies can be released
via weekly (approx Mon & Thurs)

putting out ⁵⁰ ~~100~~ males and ⁵⁰ ~~100~~ females
scattered over 4 release spots at
each release time.

~~media-rare~~

vetted
by
Kings

Put out same number of sterile males
only at some time. These sterile
males to be in addition to those in
regular release program.

15 Spinal

$$\underline{1400 N \vec{\sigma} + 1400 N \vec{P}_2}$$

A. $1400 R \vec{\sigma} - (2500n)$

B $1400 R \vec{\sigma} (5000n)$

C $1400 R \vec{\sigma} + 1400 R \vec{P}_2 (5000n)$

D $1400 R \vec{P}_2 (5000n)$
